DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al (US 4,698,895).

Miller et al discloses a driveway for magnetically levitated vehicles comprised of a series of drive modules, shown in figure 2, mounted to a primary supporting framework 1. The drive modules are connected to the framework by a series of fasteners. The fasteners are comprised of a nut and threaded bolt. Mounted with the threaded bolt is a band shaped collet and metal sheet bushing. Each drive module is attached to the framework using a pair of bearing assemblies for each end of the attached segment. The bearing assemblies being of a nut, bolt and bushings allow for removal of both the bearing assembly and the drive module.

Allowable Subject Matter

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kindmann et al (US 5,131,132) and Raschbichler et al (US 5,850,794) both disclose track assemblies for magnetically levitated vehicles.
